BresoTEC

Job Title: Software Tester
Type: Full-Time

Do you want to be part of BresoTEC, an ambitious Toronto based Canadian medical device start-up working on sleep disorders? Do you want to take a challenging role in developing and launching new technologies for diagnosing sleep apnea and beyond? Are you motivated by bringing ideas to life and working in a fast-growing cross-functional team? Do you have what it takes: experience designing, developing and testing cutting edge software, strong critical thinking and problem-solving skills? If so, this may be your opportunity to pursue a challenging position as a software tester helping to test software to support our next generation of wearable products and take part of our exciting journey, building and growing BresoTEC in Canada and beyond.

About the job

We are looking for a highly motivated and highly skilled software tester to work within an integrated and driven team to develop BresoTEC's software technology. As a software tester, you will review and verify software designs, create and execute test plans, recommend software improvements / prevent regressions, and support overall documentation efforts. You will also assist in risk assessment and will be expected to develop your own software tools to assist with testing.

Minimum Qualifications

- Thorough understanding of at least one high-level programming language
- Experience with web technologies including HTML/CSS, JavaScript, HTTP, REST and the issues that arise on different browser platforms
- Ability to use scientific analysis and mathematical models to predict and measure outcome and consequences of design.
- Experience with coding standards, code reviews, organizational tools (e.g. JIRA), version control (e.g. git)
- Sound technical writing and ability to express technical ideas fluently in English
- Knowledge of automated testing framework tools like Selenium, TestComplete

Desired Qualifications

- C/C++ programming experience
- Practical experience with benchmarking
- Knowledge of behavior-driven development/testing and relevant frameworks
- Knowledge of digital signal processing, speech processing, and/or pattern recognition
- Experience working in a regulated environment (e.g., IEC 62304)
- Effective interpersonal, teamwork, and communication skills.
- Good analysis and problem-solving skills.
- Ability to multi-task in a fast-paced environment.

Background
- BS degree minimum, MS preferred, in Computer Science or related field.
- 3+ years minimum, 5+ desired with meaningful software development experience.

Please submit your resume and cover letter, along with any other material, to hr@bresotec.com. Candidates will be assessed as applications are received. Only candidates considered will be contacted.
